About us

PAN STONE HYDRAULIC INDUS. CO. LTD. was established by qualified, dedicated and outstanding engineering team with plenty of experiences in manufacturing rubber equipment. By standardizing and organizing our work system, we persistently strive to UPGRADE QUALITY and INNOVATE OUR PRODUCTS.

We provide various kinds of custom-made products to meet customer's demands through our carefully built and well trained team of sales/ service professionals and strategically located representatives worldwide thus enabling us to implement our goal of PRODUCTS WITH ZERO DEFECT QUALITY.

PAN STONE is the preferred choice for reputed customers worldwide as supplier of rubber machines. We supply the machines to Japan, USA, Europe, South-east Asia, Middle East, China and Taiwan... etc.

Since year 2005, Pan Stone has become a transnational company. The overseas production factory is located in Anhui province, China with the total factory area of 36000 square meters.

From year 2006, Pan Stone has technical cooperation with reputed injection molding machine company, LWB Steint of Germany to develop machines of high quality injection technology.

We believe that Excellent Quality, Satisfactory Customer Service and Continuous Innovation will propel us to set the bench mark for this industry and add everlasting power to our customers.
